

# 2SLGBTQIA+ CANCER SUPPORT

Cancer often raises family and relationship issues that can be difficult to navigate, and this is especially true for members of the 2SLGBTQIA+ community.

To support individuals within this community, Wellspring offers dedicated support groups for lesbian and queer women, and gay and queer men with cancer – including those who identify as non-binary. These groups create a safe, affirming space to connect with others who share similar lived experiences, and to explore the unique personal, social and emotional impacts of a cancer diagnosis.
